

Participation of foreign athletes
in the CEB Individual Championships, qualification tournaments
and national team competitions

1. In general, only athletes who have - as their first nationality - the nationality of the country for which they are deployed are admitted to the above events.
2. An athlete shall be treated as under point 1. provided that he declares that he wishes to play for another nation with the consent of his home European national federation. In this case, it will only be able to play for this nation and no longer for its original national federation for the duration of at least 5 years.
Regardless of whether these 5 years are over or not, he will have to wait until that time to play again for his home national federation.
In the event that he plays again for his home national federation, he will again have to wait at least 5 years before being able to compete for another federation
If he is not European, he will have to reside for at least 3 years in the European country for which he intends to compete and not take part in competitions for his home country. If he participates in competitions for his country of origin, his right to participate in the CEB expires and upon his return to Europe - independently in which country - the 3-year residence clause will apply.
3. CEB competitions for club teams are governed by special rules.
